

The screenshot shows the Libelle SystemCopy interface. At the top, there are control buttons for 'START', 'STOP', and 'PAUSE'. Below that, an 'Overall Progress' section shows a progress bar with four stages: 'check' (22%), 'pre' (0%), 'copy' (0%), and 'post' (0%). A large white text overlay reads: 'Perform System- and Landscape Copies for SAP® R/3® and SAP S/4HANA® at record speed'. Below the progress bar, a 'Tasks' section is visible with a table of tasks.

ID	Start time	End time	Duration	Progress
LCHECKENVIRONMENT			00:00:02	22%
LCHECKSAPKERNEL			00:00:03	
LCHECKSAPCOMPONEN			00:00:05	
LCHECKSTMSCONFIG			00:00:03	
LCHECKDATABASE			00:00:02	
LCHECKCLIENTSETTINGS			00:00:08	

On-Premises. Hybrid. Cloud.

Libelle SystemCopy

Act faster and more efficiently with end-to-end refreshes in operations, projects and migrations.

Automation of the system refresh processes > 99 %

Significantly faster deployment of test systems

Test data anonymization

Best Practices out-of-the-box for SAP® R/3® and SAP S/4HANA®

„In the past, it took between three days and a week to create a copy of each system, but now the complete landscape can be copied within 24 hours“ [Thomas Dietrich, Klingspor AG]

Provide departments with test systems on demand - Libelle SystemCopy

Providing accurate data for testing, training, Q-systems is essential to be able to react promptly to requirements of digitalization. Whether for migration projects or daily operations, Libelle **SystemCopy** makes it possible at a push of a button. It reduces the high manual effort of performing an SAP® system or a landscape copy. Relieves the burden on SAP Basis administrators and provide test systems with current production data. Delivers swift, consistent, quality refreshes, whenever they are needed. On-premises, hybrid or within the cloud.

What do users appreciate most?

Significantly fast and optimized execution of system and landscape copies

Automation, task parallelization, optimization of the BDLS run are just some of the functions that massively reduce the run time. This enables significantly more copies to be made than ever before, whenever departments request it. Even during operation.

End-to-end automation with consistent quality with every refresh

The system or landscape copy is fully automated, including all pre and rework. The quality of the copy remains the same with every process. The automation reduces downtimes, the manual effort and thus also the dependency on specialists.

90% templates for SAP® R/3® and SAP S/4HANA® - Out-of-the-box

These cover all typical activities of a system and landscape copy. In addition, system-specific adjustments can be made very flexibly.

GDPR and Compliance

Out-of-the-box available and optional integrable.
